POLIS Conference 2020

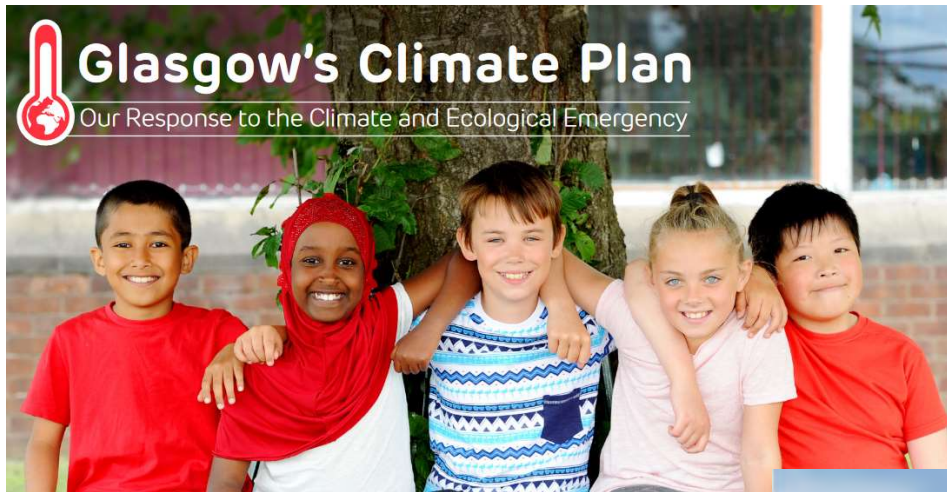

#POLIS20

Become **frontrunners** for the European climate goals
Commit through **planning** for sustainable and safe mobility
Create an open & fair **multimodal** system
Prioritise **affordable, safe and sustainable** modes of transport
Grow **sustainable alternatives**, with public transport and private services
Join forces and unlock our full potential
Promote **inclusion** as a driver for quality and innovation
Contribute to the **European Transport Network**
Clean our fleets and **green** our streets
Share, learn, and build **capacity** for change

Climate Neutrality: 2030-2050 Time Horizon

**LEUVEN
2030**

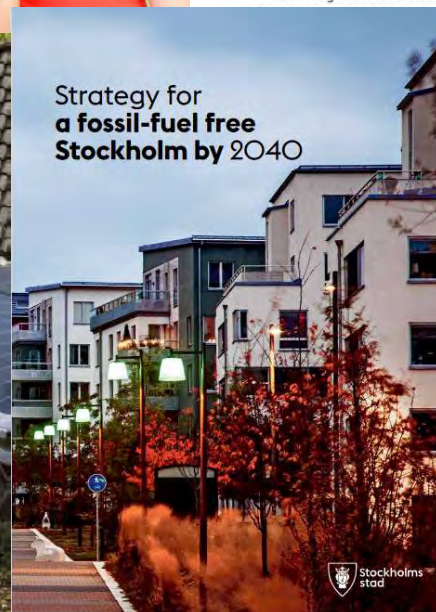

ROADMAP 2025 - 2035 - 2050

13 programs to a climate-neutral future

The time is now. Now is the time to shift from 'doing what can be achieved' to 'doing what must be achieved'. A shift that implies a systemic change to the city and its community. Leuven has the ambition, as well as the responsibility, to lead the way. The Roadmap 2025 - 2035 - 2050, drawn up by Leuven 2030 and numerous experts, serves as a guideline for achieving the goal of a climate-neutral city by 2050. In September 2019 a professional team of Program Facilitators was set up, who will translate this into action and impact.

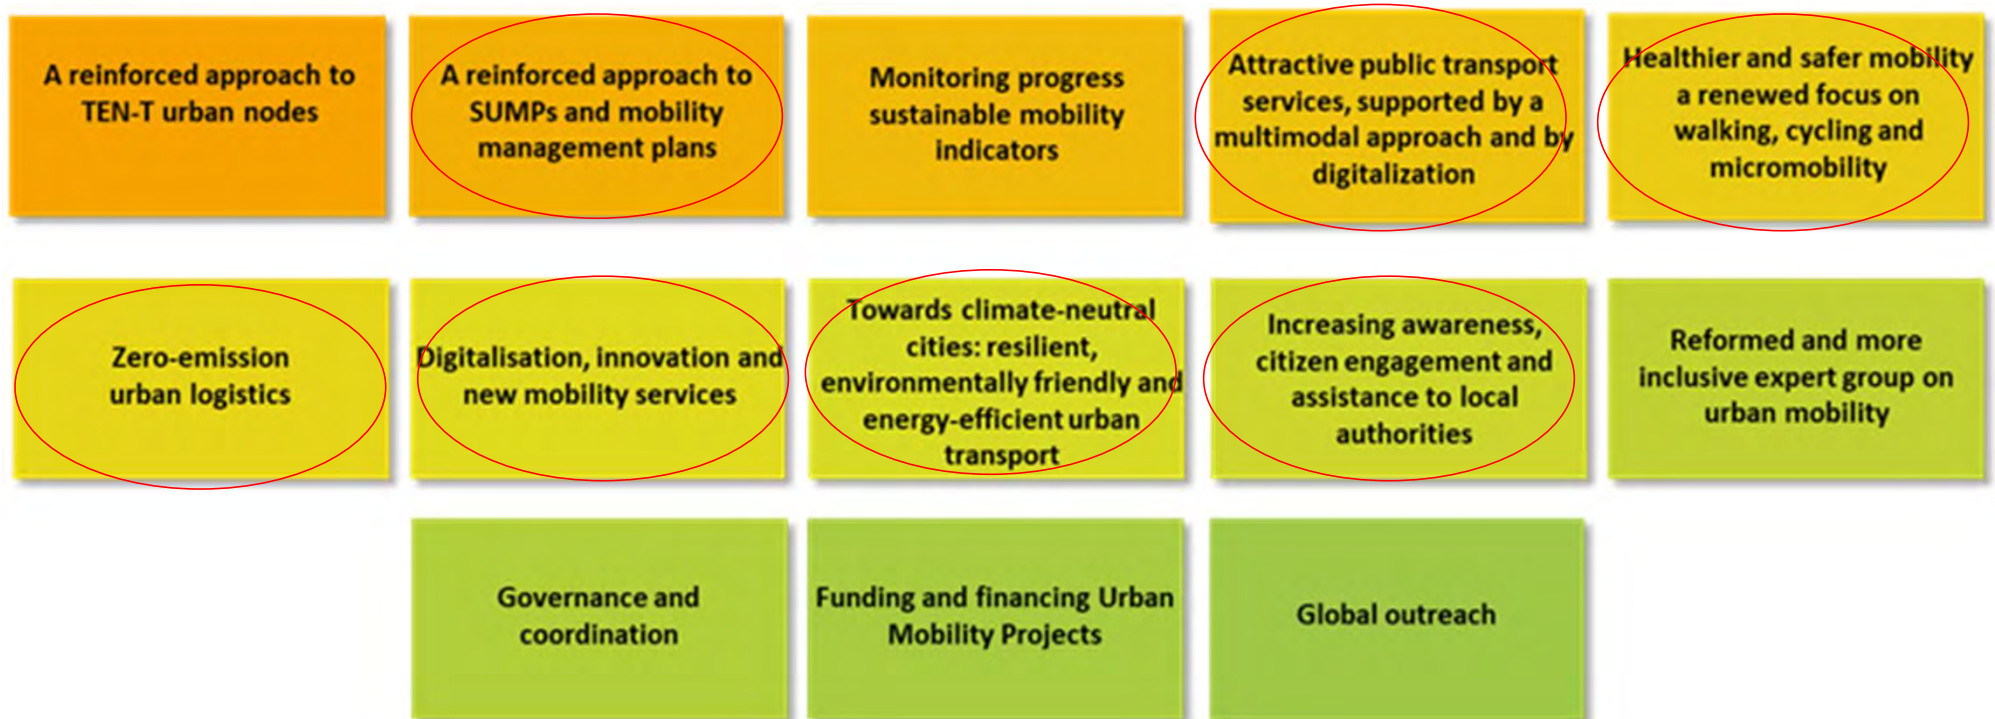

Cycling rates and the use of public transport will have doubled by 2030. By 2035 all vehicles in Leuven will be carbon-free.

'Good Move' plan wins European award

• 02 JUNE 2020

Good Move, the Brussels regional mobility plan 2020-2030, has won the 2020 edition of the Sustainable Urban Mobility Plan (SUMP) Award. The SUMP Award was handed out for the 8th time by the European Commission through Polis, the network of European Cities and Regions working together on innovative transport solutions.

Good Move is the successor to Iris 2 and lays down the main mobility policy lines. The new mobility plan was the result of a co-construction process in which most of the Brussels and Belgian stakeholders from both the public and private sectors took part. In doing so, the Brussels Government chose to return public space to Brussels residents and opted for a liveable, traffic-safe city, by focusing on car-free neighbourhoods (fewer cars and less through traffic), great public transport and smoother traffic circulation.

Brussels Mobility is extremely proud of this international recognition. "In Good Move, the jury found the following points in particular decisive: the impressive participation of the population during the public survey, the involvement of all Brussels partners in the design of Good Move, the vision of the city as an ecosystem and the programmatic dimension," the Brussels Regional Public Service explains.

This annual award is part of the **EUROPEAN MOBILITY WEEK** campaign, which takes place every

MOBILITYACTION
Award

In 2022, the European Commission introduced the **MOBILITYACTION Award**, which rewards companies and organisations that demonstrate excellence in mobility management.

POLIS

SUMP: What's next?

Cities above 100.000 inhabitants will be an essential part of the TEN-T:

- Urban Nodes linking local, regional, national and international transport flows for goods and passengers
- **Legal requirement to develop SUMP by 2025**
- Direct legal link between EU and local level

There are eight crucial principles for successful Sustainable Urban Mobility Planning

From Ambition to Action

30 km/h speed limit throughout Europe?

🕒 17.02.2022

Throughout Europe, there are now large cities, but also small communities, that have introduced 30 km/h speed limits across the board. Spain is the pioneer, where 30 km/h was already introduced in Madrid in 2018,
